

Retraction

Retraction of: Youssef Senousy, Abdulaziz Shehab, Wael K. Hanna, Alaa M. Riad, Hazem A. El-bakry, Nashaat Elkhamisy – A Smart Social Insurance Big Data Analytics Framework Based on Machine Learning Algorithms. – *Cybernetics and Information Technologies*, Vol. 20, 2020, No 1, pp. 95-111 (DOI: 10.2478/cait-2020-0007).

The paper is retracted by the authors as the paper is already published in *Journal of Theoretical and Applied Information Technology*. The Editorial Board ascertained that the retraction case is due to the authors' publishing misbehavior (parallel submissions and 2 months delay to withdraw the paper after acceptance note) and a journal lapse (failure of journal staff to check the availability of a signed publication license).
